

Results-driven Data Processing Analyst and Data Annotator with 2+ years of experience in data quality assurance, ETL pipeline optimization, computer vision annotation (CVAT), and BI reporting. Proficient in Python, SQL, Power BI, Tableau, and Looker Studio. Consistently maintained 95%+ accuracy rates across high-volume data processing workflows. Skilled in automating data cleaning pipelines, building interactive dashboards, and collaborating cross-functionally to meet dynamic SLA targets. Seeking a Data Analyst Specialist role to drive data-driven decision-making.

SKILLS

Programming & Query Languages: Python (Pandas, NumPy), SQL (Joins, CTEs, Window Functions), MySQL, Statistical Analysis
BI & Data Visualization: Power BI (Power Query, DAX), Tableau, Excel (Pivot Tables, VLOOKUP, Macros), Dashboard Development
Data Annotation & CV Tools: CVAT (Bounding Boxes, Polygons, Keypoints, AI-assisted annotation), Instance Segmentation.
Data Engineering & ETL: ETL Pipelines, Data Cleaning & Wrangling, Data Validation, Workflow Automation, Google Sheets.
Development & Collaboration: Git, GitHub, Jupyter Notebook, VS Code, MS Office Suite, Tatva Platform.
SoftSkills: Quality Assurance, Cross-functional Collaboration, SLA Management, Root Cause Analysis, Requirement Gathering.

PROFESSIONAL EXPERIENCE

Indivillage Tech Solutions LLP Sep 2023 — Present
Data Processing Analyst

Computer Vision – Data Annotation Mar 2026 — Present

- Executed multi-modal image annotation and labeling in CVAT using **Bounding Boxes, Polygons, and Keypoints** for production-grade AI/ML computer vision models. Achieved 90%+ annotation accuracy across 10,000+ images per sprint through rigorous QA validation, guideline compliance, and comprehensive dataset verification.
- Reduced annotation cycle time by 25% by leveraging CVAT interpolation and AI-assisted annotation features, accelerating project pipeline throughput.
- Annotated dense scenes and partially occluded objects to support advanced instance segmentation and object detection tasks for autonomous systems clients.
- Maintained detailed annotation logs and quality reports, enabling continuous process improvement and first-pass accuracy gains of 8%.

Program Co-ordinating June 2025 — Mar 2026

- Managed end-to-end data ingestion and preparation workflows: extracted client datasets from the Tatva validation platform, applied structured cleaning (deduplication, null handling, formatting) in Google Sheets and MS Excel, and re-uploaded finalized sets to production.
- Engineered automated data cleaning macros and formulas in Excel, reducing manual effort by 40% and cutting average delivery turnaround by 1 business day.
- Ensured 100% compliance with client data specifications and submission standards across 50+ dataset deliveries, resulting in zero rejection incidents.
- Adapted team workflows dynamically to accommodate shifting SLA targets, maintaining on-time delivery rates above 98% across all assigned projects.
- Produced weekly operational reports and status dashboards to keep stakeholders informed of pipeline health and bottleneck resolution.

Quality Control Module Apr 2024 — Dec 2025

- Maintained a 95%+ data accuracy rate by executing multi-stage validation checks (schema validation, range checks, cross-field consistency) on high-priority client datasets prior to final submission.
- Developed comprehensive error-tracking logs and defect categorization frameworks, reducing recurring data inconsistencies by 30% over two quarters.
- Authored clear, actionable error reports and correction notes shared between QC and production teams, improving first-pass acceptance rate by 15%.
- Collaborated with cross-functional teams including data engineers and client success managers to resolve data quality escalations within agreed SLAs.

Data processing Associate Nov 2023 — Mar 2024

- Processed high volumes of client data daily within the Tatva platform, validating formatting accuracy, flagging inconsistencies, and routing corrections to ensure workflow efficiency.
- Reduced Average Task Time (ATT) by 20% within first three months by developing personal productivity shortcuts and process optimizations.
- Maintained a consistent daily throughput rate exceeding team benchmarks while upholding a zero-defect submission record during the first 90 days.

PROJECTS

Ecommerce Sales Analysis Dashboard

Aug 2025— Sep 2025

Tools Used : Ms Excel,Power BI

- Built an end-to-end interactive sales analytics dashboard in Power BI, integrating and transforming raw multi-source data via Power Query — reduced manual data preparation time by 60%.
- Designed Pivot Table views and custom slicers to track KPIs: Revenue Trends, Order Volume, Profit Margins, Average Order Value (AOV), and Customer Lifetime Value (CLV).
- Implemented real-time Target vs. Actual performance tracking framework, improving management reporting efficiency by 40%.
- Applied Pareto analysis to identify the top 20% revenue-contributing product categories, providing inventory optimization recommendations projected to improve margins by 12–15%.

EDUCATION

Master of Computer Application(MCA)

Sri Balaji PG College

GPA: 8.1/10

Anantapur, Andhra Pradesh

2023-2025

Bachelor of Science

Acharya Nagarjuna University

GPA: 7.8/10

Guntur, Andhra Pradesh

2019-2022

CERTIFICATIONS & AWARDS

- **Data Analytics Professional Certification** — Coding Ninjas Competencies: Excel · Power BI · Tableau · SQL · Python · Data Visualization
- **Monthly Rockstar Performance Award:** Recognized twice with corporate performance excellence honors at Indivillage Tech Solutions (March 2024 & March 2026).
- **PrepSAT Hackathon:** Secured a rank of 10,012 out of 90,000+ global participants in the challenge hosted by PrepInsta (2023).
